HEAD OF LOCATION UPDATE – TOUSANTICOVID – FRENCH APP

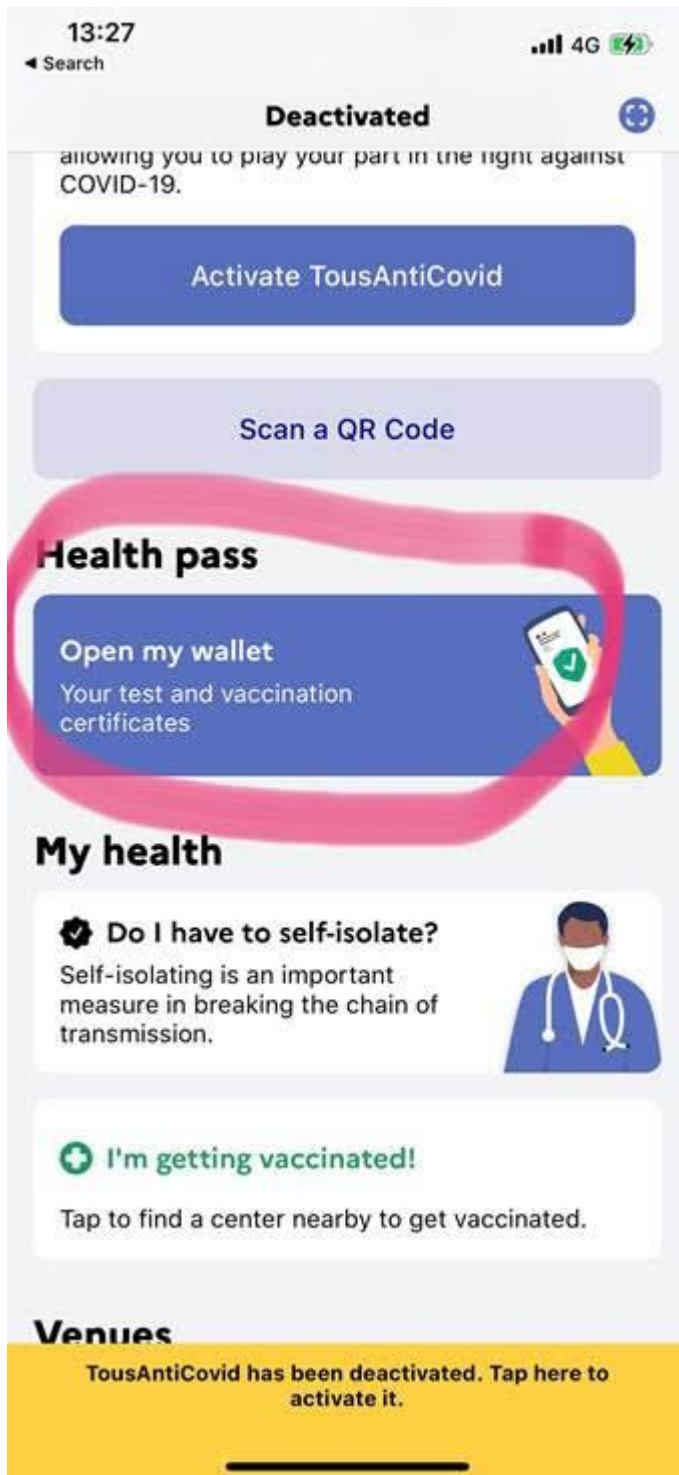

As many of you may have experienced, getting the NHS vaccinations uploaded onto the COVIDSafe.be eHealth system is not the easiest process. For some it has worked, for the majority the activation of the Digital Keys has worked but the certificates do not appear. The UK medical team have worked very hard on the process to get our details transferred direct onto the Belgium Vaccinet without having to visit a vaccination centre etc. Once you have sent your consent email to the Medical team your details are prepped in the right format and are all ready to go across in an easy transfer. However, this part is dependent on third party entry so not all have gone yet. In the meantime, as the French Government have confirmed that they will accept the NHS vaccination certificates, and the process to upload them to the French app is surprisingly easy, an quick guide has been created by a member of our community should you wish to use/try it.

1. Download ***Tousanticovid*** on the App Store. No need to 'activate'.

2. Have a copy of your NHS certificate available; either a paper copy or other electronic device so you can scan the QR code with the phone you have loaded the App onto (you can't use the same phone).

3. Press 'Open my wallet'.

4. Press add a certificate and scan the first vaccine QR code.

5. Repeat for second vaccine QR code

6. Voila
