Medical – Registering with CEP

REGISTRATION WITH THE CENTRAL EUROPEAN PRACTICE (CEP)

In the context of both COVID and EU transition, the EO/LO network in France will benefit from a sustainable approach to healthcare which is guaranteed regardless of reciprocal healthcare agreements.

In a vast majority of European Joint Support Unit – supported areas they register personnel with the Central European Practice (CEP). This ensures that you have MoD clinical personnel to reach out to and that your NHS or Defence medical record is maintained. They also provide occupational health support to military personnel. This is linked to the Healix registration which ensures that hospital care can be facilitated regardless of residence status. The CEP is a Defence Primary Healthcare practice. This is the central hub and 'virtual' medical practice for those living in Europe and Turkey, where no MoD medical facilities exist. The small team includes a practice manager, healthcare coordinators, a finance administrator and a military medic, nurse and GP. The CEP are on GPlinks so when you register, your NHS record will be pulled from archive and stored with them. They will then transfer it to your GP when you return to UK residence. CEP are integrated with the Healix OneHMG health line who provide healthcare management for those under French medical care and ensures funding readily available to hospitals. Under this arrangement there is no difference in how you access primary care (your GP or equivalent). The main difference is that if you are referred to hospital you can phone the health line to ensure that there is some oversight of your care, a UK clinical view on its suitability and a link to the MoD network of support.

Please complete the CEP registration form – CEP will issue the Medical Clearance Code for you to register with HEALIX.

If you have any queries please contact the CEP at SGDPHC-O-EJSU-Med@mod.gov.uk
